

Mai Nguyen

San Francisco, CA | 408-813-8406 | maixnnguyen@gmail.com | [LinkedIn](#) | [Github](#) | [Tableau](#)

SUMMARY

- Business Analytics/ Economics professional with 4+ years of experience in business intelligence, product growth, economic research in various industries: e-commerce, consumer goods, technology, education
- **Skills:** Proficient in SQL (Snowflake, PostgreSQL, SQL Server), Python, R, Excel, Tableau/PowerBI, AWS, Git, APIs, Salesforce, ETL automation, dashboard development
- **Techniques:** A/B testing, experimentation design, causal inference, econometrics, and machine learning (Linear & Logistic Regression, Random Forest, Gradient Boosting, K-Means, NLP, Neural Network)
- **Leadership:** Team Lead, Mainstage Operation (Vietnam Tech Summit 2025), Student Ambassador (USFCA)

WORK EXPERIENCE

University of San Francisco - Prospect Development & Analytics

San Francisco, CA

Data Analyst

November 2024 - Present

- Building and presenting **Tableau dashboards**, from Salesforce and public datasets, to enable stakeholders to monitor **marketing KPIs, conversion funnels**, and campaign performance to **increase goal by 50% by 2030**
- Developing **sentiment analysis** models for prospect notes and incorporating into the **prospect propensity score**, helping the marketing team optimize outreach and **increase lead conversion by 20%**
- Applying a **Difference-in-Differences** model to quantify a ~\$9K uplift in average donations from Fundraising Day, delivering insights that informed marketing strategy for under-engaged alumni
- Developing **User Acceptance Testing** plans to validate Data Engineers' database migration, ensure pipeline reliability, and reduce downstream errors

Fortune 500 Consumer Goods Company ([github](#))

Remote

Data Scientist

January 2021 - May 2021

- Collaborated with the Data Science team in China to analyze the traffic cannibalization on JD.com, one of China's largest e-commerce platforms with over 600 million annual active users (AAU)
- Leveraged **boosted tree models** to predict organic traffic cannibalization with **90% accuracy**, enabling marketing to optimize channel budget allocation
- Developed an **interactive R-Shiny dashboard** allowing non-technical teams to run predictions on demand, reducing cannibalization risk and **improving budget efficiency by 10%**
- Awarded **Best Paper** at the Midwest Decision Science Institute Conference
- Presented [poster](#) at INFORMS Business Analytics Conference

Educational Results Partnership ([dashboards](#))

Sacramento, CA

Data Analyst

July 2021 - April 2024

- Led the development process of the Black young adults' educational outcomes improvement project by collaborating with multiple government entities to **design data collection, study methods, and metrics**
- Designed a new **database schema** and two automated **ETL pipelines** into SQL Server: one retrieving **API data via Python**, and another leveraging **SQL Server and AWS S3 event triggers** to upsert records in real time, reducing processing time by 80% and improving **data integrity by 60%**
- Engineered **automated SQL procedures** to compute **100+ metrics on ~30+ million end-users**, providing real-time decision-making insights to colleges and policymakers to enhance post-graduation job placement

Purdue University

West Lafayette, IN

Research Assistant

January 2021 - May 2021

- Developed and deployed a web crawler using Python (Pandas, BeautifulSoup, Selenium) and Twitter APIs to collect unstructured data from the Big Four accounting firms
- Conducted **sentiment analysis** with the **NLTK package** to identify trends in public perception of the firms, providing valuable insights into brand reputation

EDUCATION

Purdue University

West Lafayette, IN

Master of Science, Business Analytics

May 2021

University of San Francisco

San Francisco, CA

Master-level courses completed: Econometrics, Causal Methods, Experimentation Design

August 2024 - Present
